- English, French, Other

*This list is not exhaustive - please enquire about your compatibility requirements

Mitel OneDirectory

The Web Directory for all your corporate contacts

You need a directory to reach people, efficiently. Our service is much more than a simple database. Mitel® OneDirectory® is a meta-directory accessible to the user from a Web interface, designed to be displayed on a computer, an office phone or a Smartphone device. It completely unifies the contact 'search and call' process within a company or an organization, allowing customer, employee and personal contacts search.

The application natively offers a large compatibility with market-wide directory technologies and thus fits with many corporate environments, while eliminating the complicated task of data transforming and loading, usually required to the administrator.

- 1 Unified contact search from the Web**
Any user environment, no deployment required
- 2 Reduced time-to-call**
Search, find AND interact immediately
- 3 Relax!**
Complete integration of all your contacts

Whether you are a large enterprise or a SMB, OneDirectory fits smoothly into your Information System

- Available on MS Windows®, MAC or Linux
- Can be virtually displayed from everywhere, including your corporate intranet.
- Search customer contacts from your CRM or your ERP
- Integrates well with all LDAP as well as proprietary SQL-based databases
- A complementary tool to your usual e-mail client
- Will match perfectly within your corporate chart

Take the tour in 5 features...

CTI interface for controlling calls from the Web

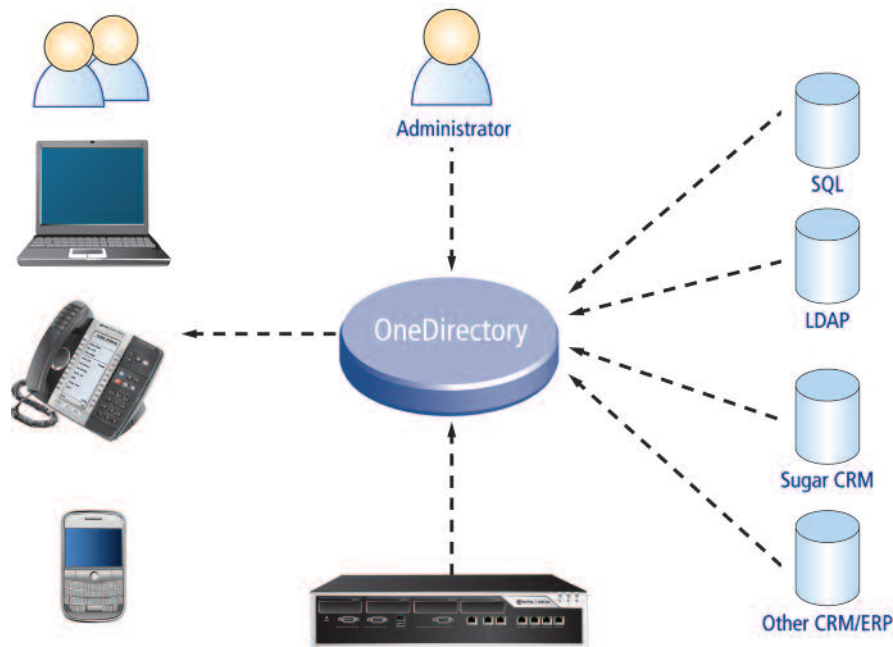

Search by keywords and reversed directory search: internal-external-personal contacts

On-the-shelf application for Mitel IP phones.

Integrates with the on-board Mitel IPBX directory.

Graphical design of smart connectors toward LDAP or SQL databases (build mode).

Cross heterogeneous database search made easy with OneDirectory
